Day 2-3 Weather Hazards

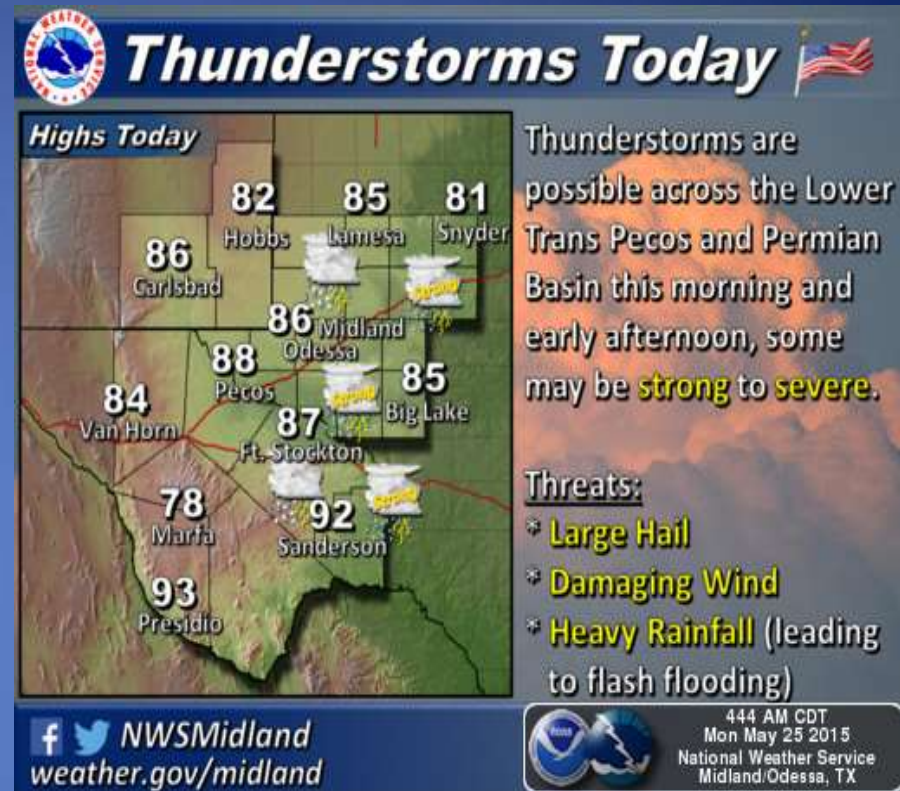

Valid: 0800 Tue - 0800 Thu

Hazardous Weather

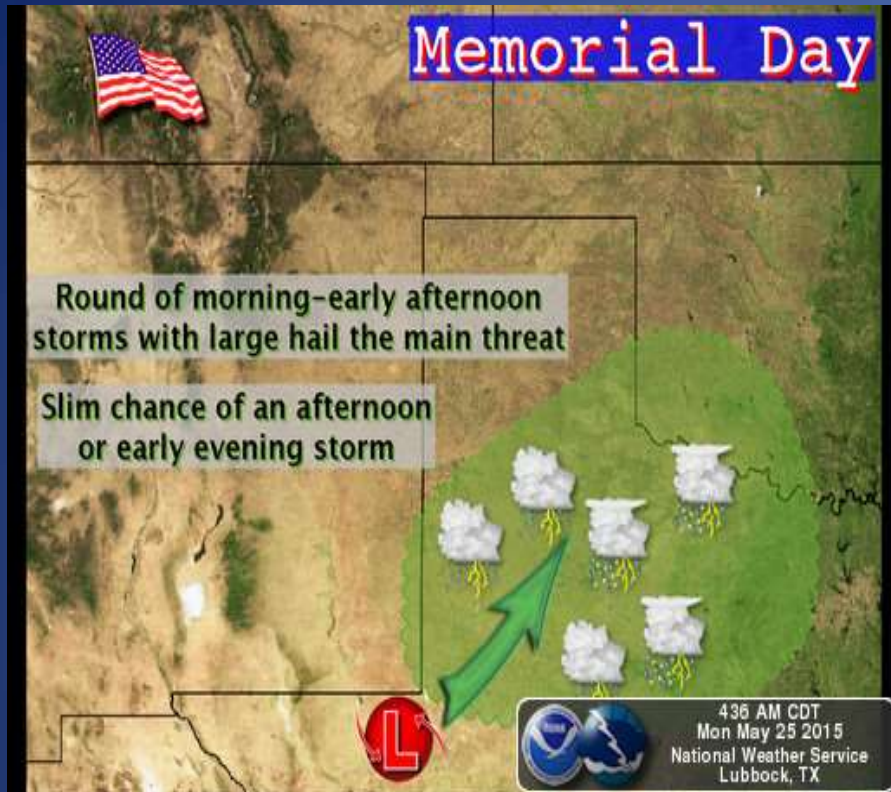

Thank you to all those who have so faithfully served our country. For Memorial Day we will see beautiful weather. We will see mostly sunny skies with just a slight chance for thunderstorms in area mountains. Our high temperatures will run a few degrees below normal. Breezy in the afternoon with west winds increasing to 15 to 25 mph.

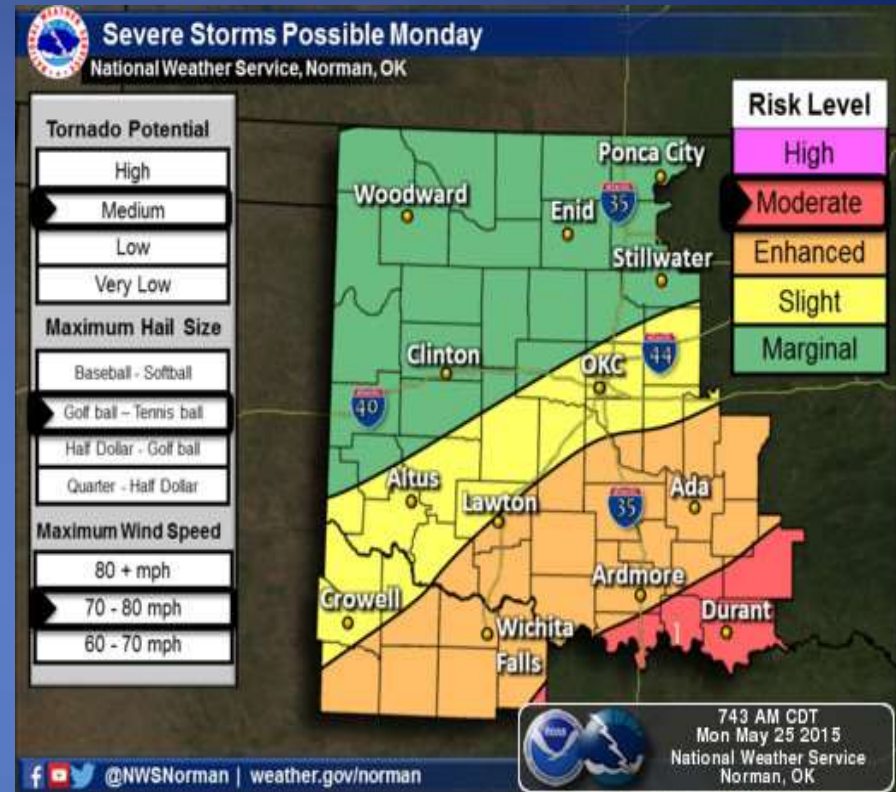

Thunderstorms are possible across the Lower Trans Pecos and Permian Basin mainly this morning/early this afternoon. Some storms could become strong to severe, capable of producing large hail and damaging wind. Locally heavy rainfall is also possible, which could result in flash flooding. High temperatures this afternoon will be seasonably warm.

Hazardous Weather

A round of morning and early afternoon thunderstorms will move through the region this Memorial Day, with a few of these having the potential to become strong to severe mainly in terms of large hail. A slight chance for a late afternoon or early evening storm will also exist along the dryline as temperatures warm into the mid 70s to mid 80s.

A storm complex is forecast to move quickly northeast across much of Oklahoma and north Texas from late morning into this evening. The greatest risk for severe weather will be along and southeast of I-44, and especially near Marietta, Durant, and Atoka.

Hazardous Weather

A flash flood watch remains in place across north Texas today. Showers and thunderstorms are expected to develop just west of the area and spread east across the region this afternoon. Some storms could become severe with large hail, damaging winds and a few tornadoes.

Hazardous Weather

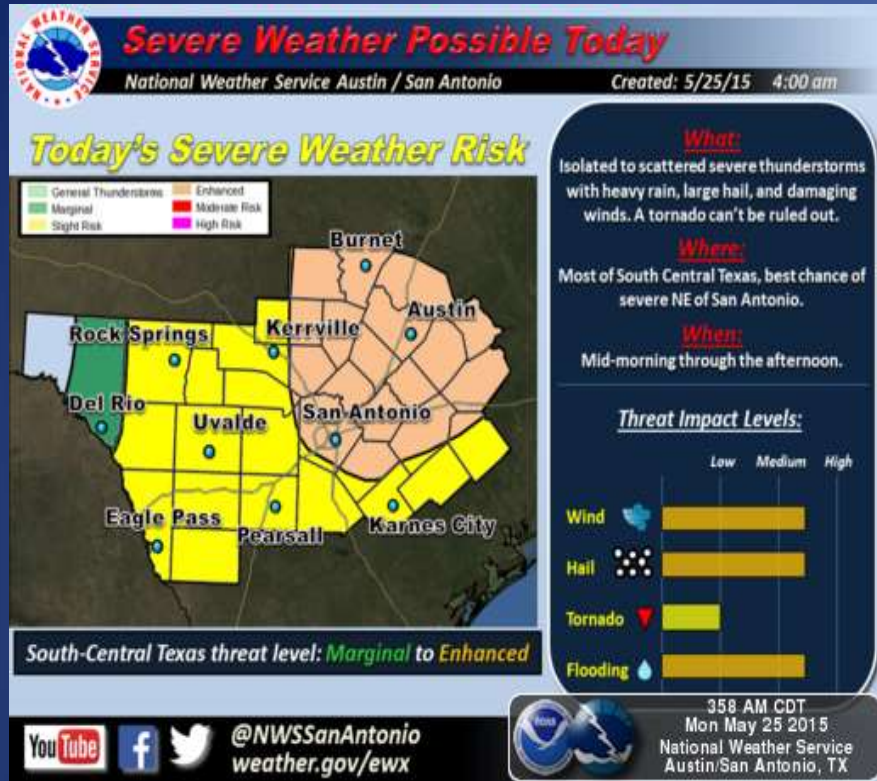

Strong to severe storms will be possible today as a disturbance moves across the state. Large hail, damaging winds, a tornado or two, and heavy rainfall will all be possible with this activity. Make sure you have multiple ways to get weather information today.

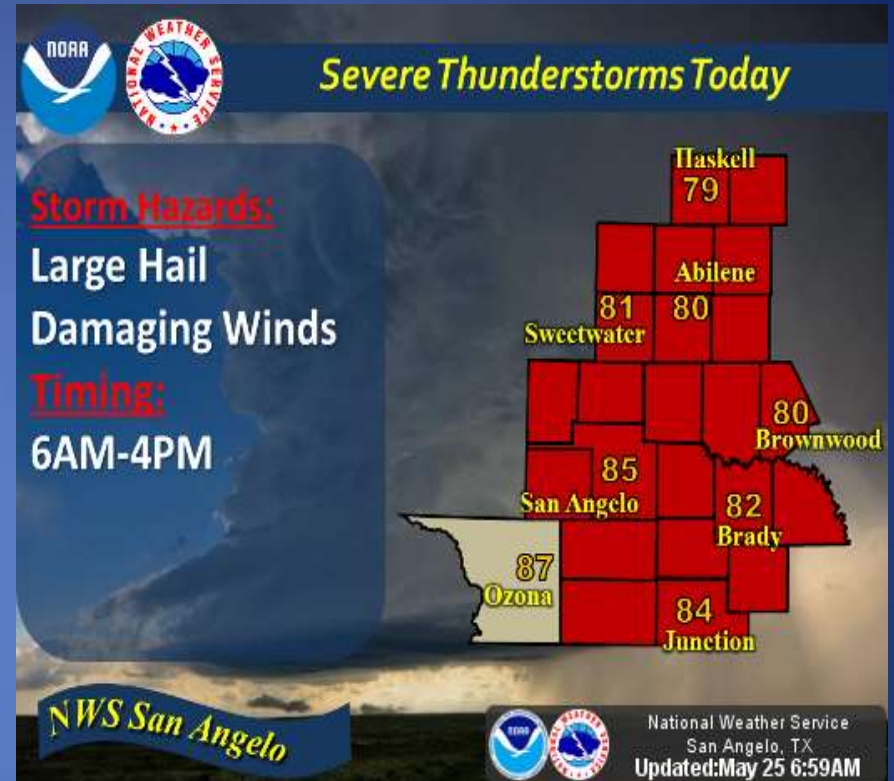

All of South Texas is in a slight risk for severe thunderstorms today and tonight. The main concern will be this afternoon and this evening for damaging straight-line winds and large hail, although an isolated tornado is also possible. Flash flooding is possible near, north and east of Interstate 37.

Hazardous Weather

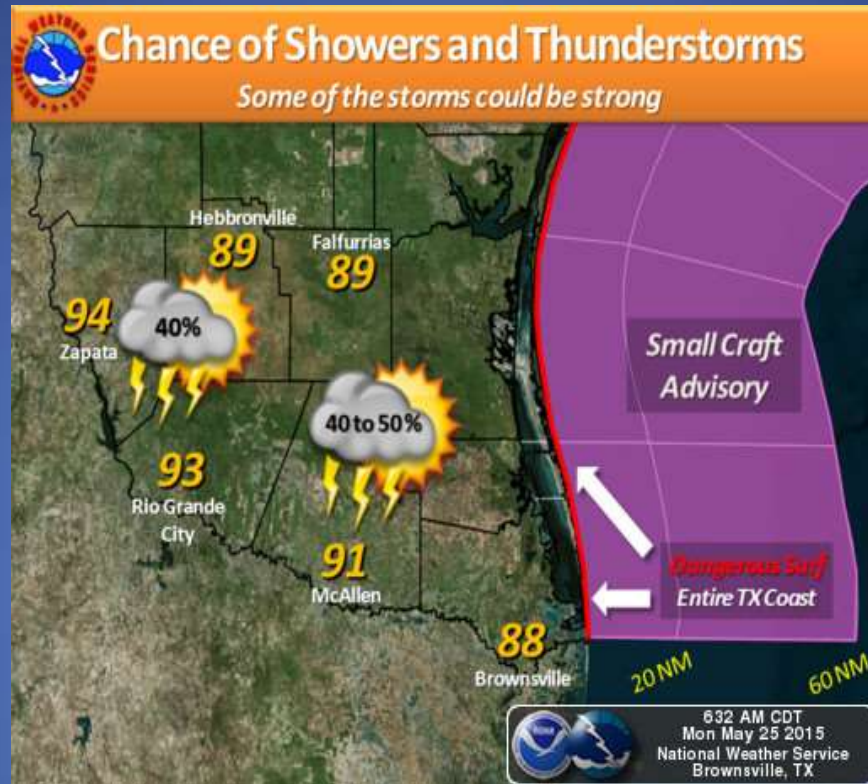

Most of South Central Texas is under either a slight or enhanced risk for severe weather. Isolated to scattered thunderstorms are expected to develop this morning and persist through the afternoon hours. Heavy rainfall, large hail, and damaging winds are the main concerns but a tornado or two will also be possible.

Showers and thunderstorms are expected to develop during the day. A few storms may become severe. If you have outdoor activities planned, please stay informed.

Hazardous Weather

There is a chance for additional showers and thunderstorms this afternoon and evening across Deep South Texas and the Rio Grande Valley. Otherwise, conditions will be muggy with warm high temperatures. Be sure to use extreme caution along the coast and over the Gulf Waters. There is a High Risk for rip currents and a Small Craft Advisory on the Gulf waters. Small Craft Should Exercise Caution over the Laguna Madre with choppy conditions, so just use some caution if you have family plans.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
05/24/15	Urban and Small Stream Flood Advisory	Caldwell, Guadalupe, Hardin, Hays, Jefferson, and Orange Counties
05/24/15	Flood Warning	Bexar, Burleson, Caldwell, Calhoun, Cameron, Collin, Cooke, Dallas, Denton, Ellis, Gonzales, Guadalupe, Hardin, Hays, Jefferson, Lee, Limestone, McMullen, Milam, Mineola, Refugio, Robertson, Tarrant, Travis, Tyler, Uvalde, Victoria, Wichita, Wilbarger, and Wood Counties
